

MANAGED PENETRATION TESTING SERVICE

Maximize the effectiveness and efficiency of your security testing initiatives with comprehensive program management, strategic guidance, and a dedicated team of experts, tailored to your business.

YOUR SUCCESS IS OUR SUCCESS

WE MANAGE THE COMPLEXITY SO YOU CAN FOCUS ON YOUR BUSINESS

Bishop Fox's Managed Penetration Testing Service is a scalable, tailored solution for organizations with extensive and evolving testing needs. With proven frameworks, best practices, and decades of experience, our team acts as an extension of your organization to help you achieve your security and operational goals efficiently and effectively.

We partner closely with you to understand your priorities, align our services accordingly, and create a security testing roadmap based on expertise honed over thousands of engagements. Once plans are in place, we manage all aspects of your program so your objectives are met with minimal disruption to your business. This includes onboarding and offboarding consultants, coordinating and scheduling across multiple projects, teams, and timelines, and tracking budgets and purchase order consumption. Our processes can be tailored as needed to integrate seamlessly into your existing security reports and systems.

To meet your growing business requirements and the dynamic nature of the security landscape, you have prioritized access to additional resources if new projects come online or new skill sets are required.

KEY BENEFITS

	Operational efficiency
	More effective programs
	Strategic security partnership
	Actionable, informed insights
	Better ROI

KEY OUTCOMES

Comprehensive Program Management

We prioritize, coordinate, and schedule multiple projects, teams, and timelines across your programs so your objectives are met with minimal disruption to your business operations.

Onboarding and Offboarding Support

We manage credentials, provisioning, systems access, and compliance reviews for our consultants at the start of a project. We also facilitate offboarding to ensure security hygiene and knowledge transfer.

Continuous Process Improvement

We drive efficiencies in your security programs by identifying and recommending process improvements that can speed testing cycles and optimize repeatable tasks.

Process and Systems Alignment

We work with you to tailor our processes and deliverables as needed so they can be easily integrated into your existing security reports and systems.

Program Budget Management

We proactively track budgets and spending associated with your program, alleviating time-consuming processes from your staff while ensuring purchase orders are consumed before they expire.

YOUR BISHOP FOX TEAM

Through our Center of Excellence approach, we ensure consistency, communication, and focus across your organization's engagements with Bishop Fox. Your team includes at least one program manager, technical program manager, account executive, and engagement manager, in addition to the consulting pod.

This is our standard Managed Penetration Testing Service account structure. The exact structure will vary according to the needs of each organization.

ABOUT BISHOP FOX

Bishop Fox is the leading expert in offensive security, providing comprehensive assessment of modern environments with continuous attack surface management, red teaming, and penetration testing for applications, cloud, network, and products. We've worked with more than 25% of the Fortune 100, half of the Fortune 10, eight of the top 10 global technology companies, and all of the top global media companies to improve their security. Our Cosmos platform won six awards for innovation in 2022 from programs including SC Media, The American Business Awards, The Globees, and Cyber Defense Magazine, and was named an Attack Surface Management Fast Mover and Leader in both 2022 and 2023 by GigaOm. We've been actively contributing to and supporting the security community for almost two decades and have published more than 16 open-source tools and 50 security advisories in the last five years.
