

Fortune 500 Healthcare Company Secures Attack Surface With Bishop Fox; Views Security Firm As “Trusted Advisor”

Introduction

This case study of a Fortune 500 healthcare company is based on a September 2023 survey of Bishop Fox customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Bishop Fox has helped us secure our external attack surface and improve the strength of our security posture.

The service has been excellent — proactive and comprehensive.”

Challenges

With a tremendous amount of sensitive PII data, the healthcare industry is a prime cybersecurity target for hackers.

As a leading global healthcare services company, the profiled customer was faced with the following security challenges:

- Identifying new or unknown weaknesses
- Securing an expanding attack surface
- Meeting cyber insurance requirements and lowering premiums
- Demonstrating due diligence to partners and third parties
- Satisfying compliance and regulatory requirements

Use Case

With a history of successful past engagements, the profiled company was familiar with Bishop Fox’s **offensive security reputation, subject matter expertise, methodologies and tools**, as well as **customization to meet client objectives** and **remediation and reporting needs**.

Based on these reasons, they chose Bishop Fox to address their security challenges with the following solutions:

- Cosmos Attack Surface Management
- Application Security Services
- Network Penetration Testing Services
- Cloud Security Services

Results

The company was **“Extremely Satisfied”** with outcome of their latest engagements. Compared with other cybersecurity companies the healthcare leader has evaluated or worked with in the past, Bishop Fox performed **“Better/Significantly Better”** in delivering the following results:

- Understanding their targeted outcomes and objectives
- Adapting and customizing engagements to meet unique requirements
- Applying the latest tactics, techniques, and procedures observed in real-world attack scenarios
- Replicating the knowledge and abilities of skilled adversaries
- Identifying threats and weaknesses
- Prioritizing and communicating findings
- Enabling the remediation of threats
- Serving as a trusted advisor

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Fortune 500

Industry:
Healthcare
